MIXED FLOW FAN

Efficent, Quality and Aesthetic Products Enriching Your Facility

ABOUT US

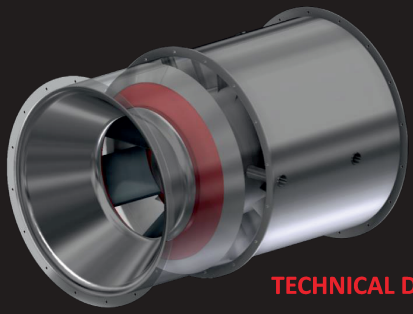

ED-VAN with experienced technical staff offers service in the solution of de-dusting and ventilation problems.

For a solution of your problems, exploration, project designing, manufacturing, installation and start-up processes are carried out under the responsibility of our company.

All products in ED-VAN are designed and manufactured in its manufacturing plant by its own technical team.

In 1975, the manufacturing facility of ED-VAN was established on a 19.500 m^2 area, and an 8.000 m^2 enclosed area is actively used for manufacturing purpose.

Also all equipment and systems manufactured in ED-VAN manufacturing plant meet the requirements of environmental regulations. ED-VAN products are used in all areas of industry and manufactured consciously by considering consumer protection accordance with the national and international standards and norms.

TECHNICAL DATA

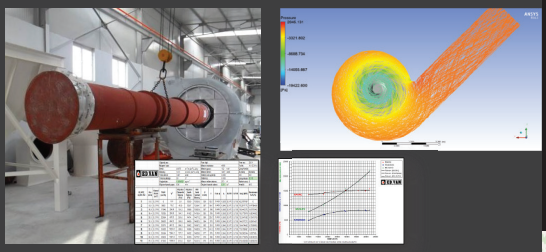

Mixed flow fans can be manufactured as;
Backward curved and aerofoil.

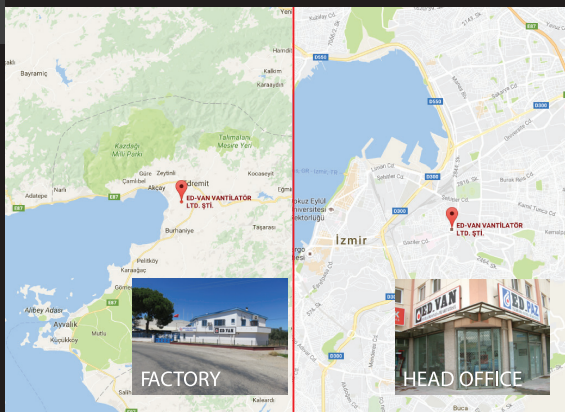

Mixed flow fan drive system is classified as;
Direct driven
Coupling driven
Belt driven

All Mixed flow fans can be made out of;
Carbon steel; St37/2, St52/3
Corrosion resistant; AISI304/316,
Spark Resistant; Aluminium,Brass.

Auxiliary Equipment:
Valves (inlet valves , butterfly valves, sliding valves and volumetric valves) with actuator, piston or manual valves
Silencers
Housing insulation with glass wool, rock wool, and ceramic wool etc.
Temperature, vibration, speed, pressure sensors etc.
Special sealing equipment
Standard and special type compensators
