AXIAL FANS

Efficent, Quality and Aesthetic Products Enriching Your Facility

ABOUT US

ED-VAN with experienced technical staff offers service in the solution of de-dusting and ventilation problems.

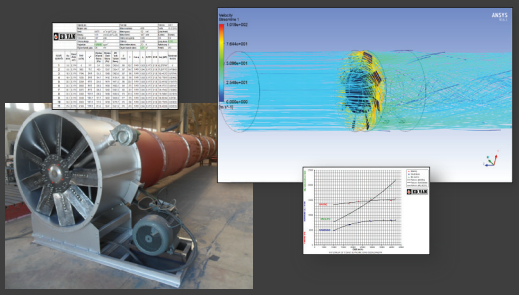

For a solution of your problems, exploration, project designing, manufacturing, installation and start-up processes are carried out under the responsibility of our company.

All products in ED-VAN are designed and manufactured in its manufacturing plant by its own technical team.

In 1975, the manufacturing facility of ED-VAN was established on a 19.500 m^2 area, and an 8.000 m^2 enclosed area is actively used for manufacturing purpose.

Also all equipment and systems manufactured in ED-VAN manufacturing plant meet the requirements of environmental regulations. ED-VAN products are used in all areas of industry and manufactured consciously by considering consumer protection accordance with the national and international standards and norms.

R&D AND TEST STUDIES

TECHNICAL DATA

Axial fans, based on capacity and pressure, can be manufactured at different:

blade profiles and blade numbers

Axial Fan drive system is classified as:

Direct- Coupled
Direct – Coupled with Coupling
Belt- Drive

All Axial Fans are made out of:

Carbon Steel (St 37/2, St 53/2, etc.)
Stainless Steel (AISI 304/316/321/309/310)
Aluminum Casting

Auxiliary Equipment:

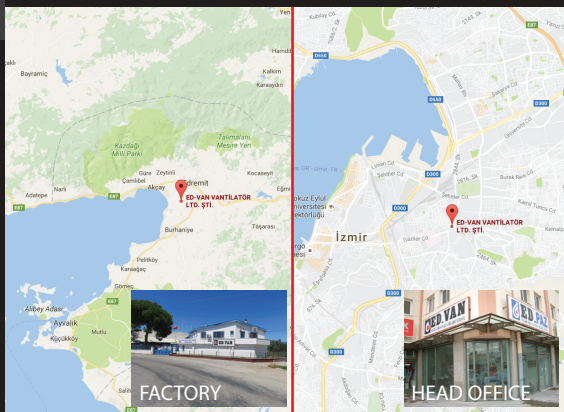

Valves (volumetric valves)
Silencers (rectangular and circular type)
Housing insulation with glass wool, rock wool, and ceramic wool etc.
Temperature, vibration, speed, pressure sensors etc.
Standard and special type compensators
