WET SCRUBBERS

Efficent, Quality and Aesthetic Products Enriching Your Facility

ABOUT US

ED-VAN with experienced technical staff offers service in the solution of de-dusting and ventilation problems.

For a solution of your problems, exploration, project designing, manufacturing, installation and start-up processes are carried out under the responsibility of our company.

All products in ED-VAN are designed and manufactured in its manufacturing plant by its own technical team.

In 1975, the manufacturing facility of ED-VAN was established on a 19.500 m^2 area, and an 8.000 m^2 enclosed area is actively used for manufacturing purpose.

Also all equipment and systems manufactured in ED-VAN manufacturing plant meet the requirements of environmental regulations. ED-VAN products are used in all areas of industry and manufactured consciously by considering consumer protection accordance with the national and international standards and norms.

Wet Scrubbers are devices removing particles from industrial exhaust streams. They are employed intensely when;

having sparking risks with dust and gas mixtures in humid surroundings.

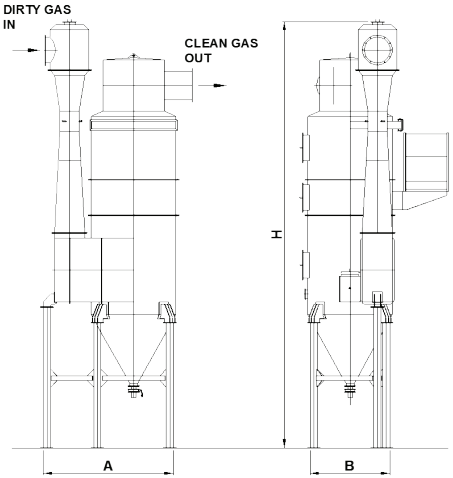

Wet Scrubbers, depending on the type of process, are selected, designed and manufactured as

rectangular or cylindrical type with / without pump

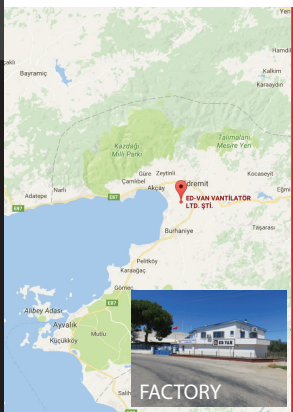

All Wet Scrubbers are made out of

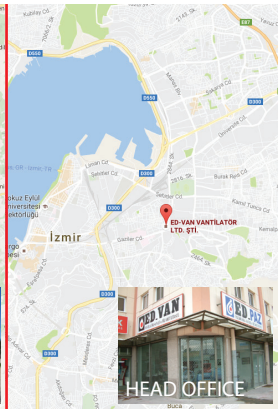

carbon steel (St 37/2, St 53/2, etc.)
stainless steel (AISI 304/310)

TECHNICAL DATA

TYPE	CAPACITY m^3/h	A (mm)	B (mm)	H (mm)
